

VOLUNTEER FOR... LET'S SAVE THE BEAR!

Ph. Francesco Culicelli

The **Marsican brown bear** is an endangered species (IUCN) that suffers from many human-related threats. This situation hinders the expansion of the small population (50-60 individuals) outside of its core area, the Abruzzo, Lazio and Molise National Park.

The Italian NGO **Salviamo l'Orso** is committed in the conservation of the **Marsican brown bear** and is looking for passionate, **dedicated and hardworking volunteers**, and placement students.
